Nesyna S., Starovoit N.  
**Professional and psychological readiness of kindergarten teachers for inclusive education**  
The aim of the research is to study psychological and professional readiness of kindergarten teachers for inclusive education. 210 kindergarten teachers from Kaliningrad and region were included in the sample. A questionnaire was applied as a data-gathering tool. According to the
results, kindergarten teachers accept the idea of inclusive education positively and expect that all children (with special needs or not) would receive big benefit. At the same time, realization of the idea of inclusive education causes anxiety and fears, associated with lack of readiness of children and adult, necessity of special conditions for successful inclusion. Most kindergarten teachers don’t have professional and educational experience for interaction with children who have special needs. Moreover it has been revealed deficiency of psychological and professional readiness for inclusive education in the groups of kindergarten teachers, especially cognitive and behavioral components. Successful realization of inclusion requires additional professional training and development of system of pedagogical and psychological support for kindergarten teachers.
